

Ash and Oath Current Game Breakdown

A simple inventory of playable content, costs, rewards and visual assets

This document is a snapshot of the current codebase for evaluation. It separates content that is already live, content built and tested but awaiting deployment, and future concepts that are not yet implemented. Values are taken from the game source, not estimated from screenshots.

At a glance

Area	Current amount	Evaluation note
Settlement tiers	6	Complete early-to-late progression ladder.
Dungeons	3 dungeons, 15 stages	The largest current content limitation.
Army gear	4 weapon kits, 1 armor kit	Functional mixed loadouts; limited variety.
Character loot	5 weapon names, 5 armor names	One item identity per rarity; no equipment sets.
Hidden discoveries	5 runes, 5 companions	Companions have leveling and abilities.
Loot chests	3	Different odds and prices; all currently share one image.
AI raid targets	18	Three ranks for every settlement tier.
Factions	4	Each has one permanent gameplay bonus.
Production illustrations	15 WebP images plus favicon	Many systems still rely on icons or shared artwork.

Release status

Status	Content
Live	Core economy, settlements, buildings, army and armory, three dungeons, loot, companions, chests, AI raids, real PvP, bank, leaderboard, factions, admin dashboard.
Built and tested; deployment pending	Incoming attack log and increased settlement tribute. Firebase rejected the last deployment because the CLI login expired.
Planned only	Twenty-dungeon roadmap, expanded character slots, armor sets, crafting, clans and alliances, companion evolutions, additional loot families.

Best evaluation questions

Is the six-tier economy paced correctly? Are three dungeons enough for an alpha? Does the current ten-name loot pool create meaningful collection? Do players have enough decisions after finishing settlement upgrades? Those are the main product questions exposed by this inventory.

New player start and core economy

Starting account

Starting value	Amount or item
Gold	1,800
Action Points	36 of 60
Settlement	Homestead
Offensive soldiers	6, armed with militia blades
Defensive soldiers	4, armed with militia blades
Character weapon	Traveler's Blade - common - 14 power - sells for 45 gold
Character armor	Weathered Leathers - common - 10 power - sells for 35 gold
Buildings	None
Faction	Not selected
Storage limits	200 character items; up to 1,000 of each army kit per role

Automatic resources

Rule	Current behavior
Turn length	5 minutes
AP recovery	5 AP per turn
AP cap	60
Offline limit	144 turns or 12 hours per absence
Gold destination	Tribute goes to exposed treasury, not the bank
Bank interest	Shares the same 12-hour offline limit

Main gold sources

Settlement tribute, dungeon victories, AI stronghold bounties, real-player PvP plunder, item sales and bank interest. Gold pays for settlement upgrades, buildings, recruits, unit equipment, chests, bank and barracks upgrades, companion treatment and faction contributions. Personal expedition extraction is free.

Main AP costs

Activity	AP
Army dungeon raid	5
Personal dungeon expedition battle	7
AI stronghold raid	8
Real-player PvP attack	8

Settlement upgrades

Settlement upgrades raise passive tribute, base troop capacity and milestone access. Costs and base capacity are live. The higher tribute values are built and tested but still await deployment; the live site retains the previous values until Firebase deployment succeeds.

Tier	Upgrade cost	Live gold / turn	Prepared gold / turn	Base beds	What it gives
Homestead	Starting home	30	30	20	Armory
Settlement	800	45	65	30	Bank, Blacksmith, Trader, Watchtower, spears, PvP
Village	6,000	70	140	45	Personal expeditions, longbows
Castle	22,000	110	290	70	Royal halberds
Stronghold	65,000	170	600	110	Higher income and capacity
Citadel	160,000	250	1,200	160	Maximum settlement tier

Prepared income payback

Upgrade	Incremental tribute payback
Settlement	1.9 collected hours
Village	6.7 collected hours
Castle	12.2 collected hours
Stronghold	17.5 collected hours
Citadel	22.2 collected hours

Payback uses the added tribute over the previous tier, before the Verdant faction bonus. It excludes raids, loot sales, bank interest and spending. Existing accounts receive the prepared income automatically when it is deployed.

Troop capacity formula

Total capacity equals the settlement base beds plus 20 beds for every barracks expansion. A Citadel with all 20 barracks levels can hold 560 soldiers.

Buildings and permanent upgrades

Building	Unlock	Cost	What it gives
Armory	Homestead	300	Recruit, transfer and organize offensive and defensive troops; unlock barracks expansions.
Bank	Settlement	1,000	Protected savings; 5% deposit fee rounded up; free withdrawals; level-based interest.
Blacksmith	Settlement	400	Purchase and assign army weapons and padded armor.
Trading Post	Settlement	250	Buy loot chests and sell unequipped character items.
Watchtower	Settlement	350	Adds 30 base realm defense and links to war defenses.

Bank levels

Level	Cost to reach	Capacity	Interest / 5 min
1	Build for 1,000	5,000	0.001%
2	2,000	10,000	0.002%
3	4,000	20,000	0.003%
4	8,000	40,000	0.004%
5	16,000	80,000	0.005%
6	32,000	160,000	0.006%
7	64,000	320,000	0.007%
8	128,000	640,000	0.008%

Interest compounds into protected savings, carries fractional gold forward and stops at capacity. Deposits destroy 5% of the transferred amount. Withdrawn gold becomes spendable and exposed to PvP.

Barracks levels 1 through 10

Level	Cost	Added beds	Total added
1	600	20	20
2	810	20	40
3	1,094	20	60
4	1,476	20	80
5	1,993	20	100
6	2,690	20	120
7	3,632	20	140
8	4,903	20	160
9	6,619	20	180
10	8,936	20	200

Barracks levels 11 through 20 and factions

Level	Cost	Added beds	Total added
11	12,064	20	220
12	16,286	20	240
13	21,987	20	260
14	29,682	20	280
15	40,070	20	300
16	54,095	20	320
17	73,028	20	340
18	98,588	20	360
19	133,094	20	380
20	179,677	20	400

Faction choices

Faction	Motto	Permanent bonus
Iron Covenant	Together, unbroken.	+5% army attack
Verdant Pact	From roots, we rise.	+5% tribute income
Ashen Order	Through fire, truth.	+10% personal expedition strength
Tidebound	No crown owns the sea.	+5% realm defense

The first faction choice is free. A player may change faction once per shared 28-day season. Points already earned remain with the old faction. Same-faction PvP is allowed but awards no renown. Alliances and clans are not implemented.

Campaign scoring

Ordinary dungeon wins award 5, 10 or 15 renown by dungeon. Boss wins award 30, 60 or 90. A real PvP win against another faction awards 20. Gold contributions award 1 renown per 20 gold, in multiples of 100, with a daily contribution cap of 2,000 gold. AI raids award no renown.

Army, recruitment and equipment

Army structure

Soldiers are assigned to offense or defense. Offensive soldiers can attack players, AI strongholds and dungeons. Defensive soldiers protect the realm and cannot be deployed. Recruiting costs 60 gold per soldier, and every recruit arrives without a weapon or armor. Transfers are free, but transferred soldiers arrive unequipped; their old gear remains in the source armory.

Army kit	Unlock	Cost each	Soldier strength	Special use
Militia blades	Homestead + Blacksmith	50	12 total (4 base + 8 weapon)	Basic kit
Sentinel spears	Settlement + Blacksmith	70	15 total (4 + 11)	Up to +10% vs Charging
Ranger longbows	Village + Blacksmith	100	18 total (4 + 14)	Up to +10% vs Channeling
Royal halberds	Castle + Blacksmith	150	22 total (4 + 18)	Up to +10% vs Fortified
Padded armor	Settlement + Blacksmith	80	No attack gain	+4 defense on garrison; up to 20% fewer dungeon casualties

Equipment rules

A role can mix weapon types. Buying to storage does not equip the kit; buying and equipping is atomic. Reusing stored gear is free. Assigning a stronger weapon fills unarmed soldiers first, then returns weaker assigned weapons to storage. Offensive gear is locked during a personal expedition. Defensive gear remains manageable.

Casualties

Dungeon and losing PvP casualties permanently destroy the fallen soldiers assigned weapons and armor. Unarmed and unarmored soldiers are lost first; stored kits and gear assigned to undeployed reserves remain safe. Winning AI or PvP battles cause no offensive casualties. Dungeon victories always lose at least one deployed soldier.

Power summary

Army attack combines 4 base strength per offensive soldier plus each assigned weapon. Defense combines 4 base strength per defender, defensive weapons, 4 per padded armor kit and 30 from the Watchtower. Faction, rune and companion bonuses then apply.

Dungeons and stage rewards

There are three dungeons with five stages each. Clearing stages unlocks the next stage; clearing stage five unlocks the next dungeon. Cleared stages remain farmable. Gold varies from 90% to 110% of the table value. Personal expeditions add 50% gold before companion Scavenger bonuses.

Dungeon / stage	Enemy	Base gold	Renown	Encounter
Whispering Woods 1	55	180	5	The Forgotten Path
Whispering Woods 2	85	260	5	Briar Hollow
Whispering Woods 3	120	380	5	The Sunken Shrine
Whispering Woods 4	165	520	5	Watcher's Crossing
Whispering Woods Boss	220	850	30	The Thornbound Guardian
Hollowcrypt 1	260	600	10	The Silent Stair
Hollowcrypt 2	340	780	10	Hall of Echoes
Hollowcrypt 3	430	1,000	10	The Bone Archive
Hollowcrypt 4	530	1,350	10	The Kingless Court
Hollowcrypt Boss	660	2,100	60	The Oathless King
Ember Citadel 1	740	1,500	15	The Cinder Gate
Ember Citadel 2	900	1,900	15	Furnace of Names
Ember Citadel 3	1,100	2,400	15	Ashfall Bridge
Ember Citadel 4	1,350	3,200	15	The Crimson Spire
Ember Citadel Boss	1,700	4,800	90	The Last Flame

Army raid versus personal expedition

Mode	Requirement and risk
Army raid - 5 AP	Choose 1 or more offensive soldiers. Rewards bank immediately. Character gear is safe.
Personal - 7 AP	Village required. Character joins party and earns +50% gold. Rewards stay in a satchel until free extraction.
Personal defeat	Equipped non-companion character gear and the entire satchel are lost. Bonded companion survives injured.

Dungeon combat and loot odds

Formation	Power	Casualty multiplier	Counters
Balanced	100%	1.0	Fortified
Aggressive	115%	1.7	Channeling
Guarded	90%	0.5	Charging

Matching the enemy behavior adds 20% strength and reduces casualties by another 25%. Matching spears, longbows or halberds adds up to 10% strength based on party coverage. Every combat also rolls uniformly from 0.85x to 1.15x final strength.

Dungeon casualty rules

Victory starts at 4% of deployed troops on normal stages and 8% on bosses, then formation, counter, armor and companion protection modify it. At least one soldier dies. Defeat starts at 45% before the same protection modifiers. Exact forecasts are visible only to administrators; players see qualitative danger and the actual result.

Loot probability by dungeon

Dungeon	Common	Uncommon	Rare	Epic	Legendary	Rune	Companion
Whispering Woods	43%	36%	18%	2.8%	0.2%	4%	1%
Hollowcrypt	10%	38%	42%	9%	1%	8%	2%
Ember Citadel	0%	16%	54%	26%	4%	14%	4%

Normal victories have a 65% chance to produce character weapon or armor. Bosses always produce at least rare gear. Rune and companion rolls are independent, so one battle can yield multiple items. Runes stay hidden from players until their first discovery.

Character item power by rarity and dungeon

Rarity	Name examples	Woods / chest	Hollowcrypt	Ember Citadel	Sell
Common	Iron Longsword / Scout Jerkin	16-21	20-26	25-31	45
Uncommon	Warden's Edge / Briarhide Coat	25-30	32-38	40-45	80
Rare	Moonsteel Saber / Sentinel's Plate	42-47	54-60	67-73	160
Epic	Oathkeeper / Mantle of the Fallen	70-75	91-96	112-117	380
Legendary	Dawnbringer / Aegis of the First King	115-120	149-155	184-189	900

Character loot, runes and chests

Current character equipment slots

One weapon, one armor, up to two runes and one companion can be equipped. The proposed helm, chest, gloves, greaves, boots, off-hand and accessory system is not implemented. Armor sets and set bonuses are not implemented.

Current generated loot names

Rarity	Weapon	Armor	Rune	Companion
Common	Iron Longsword	Scout's Jerkin	Rune of Resolve	Woodland Fox
Uncommon	Warden's Edge	Briarhide Coat	Rune of Vigor	Mossback Owl
Rare	Moonsteel Saber	Sentinel's Plate	Rune of Ascendance	Silverfang Wolf
Epic	Oathkeeper	Mantle of the Fallen	Rune of the Ancients	Ember Drake
Legendary	Dawnbringer	Aegis of the First King	Rune of Eternity	Dawn Phoenix

Rune power

Rune	Bonus
Resolve	3%
Vigor	4%
Ascendance	6%
the Ancients	9%
Eternity	12%

Equip up to two runes. Their combined bonus is capped at 30%. Runes affect army attack, realm defense and personal strength. Runes can be lost on personal expedition defeat.

Loot chests

Chest	Cost	Common	Uncommon	Rare	Epic	Legendary
Wayfarer's Chest	250	55%	30%	12%	2.5%	0.5%
Warlord's Chest	800	10%	38%	40%	10%	2%
Sovereign's Chest	2,400	0%	10%	50%	32%	8%

Chests require the Trading Post and contain equipment only: 50% weapon, 50% armor. After nine consecutive results below epic, the tenth chest upgrades a sub-epic roll to epic. The guarantee counter is shared by all chest tiers and resets on epic or legendary.

Companions

One companion can be bonded at a time. All species correspond to rarity. A companion adds strength and dungeon casualty protection while healthy. Every new companion also rolls 0.00 to 2.00 percentage points of innate quality and one random ability with a separate 0.00 to 2.00 roll.

Rarity	Species	Base bonus	Portrait
Common	Woodland Fox	2%	companion-0.webp
Uncommon	Mossback Owl	3%	companion-1.webp
Rare	Silverfang Wolf	4%	companion-2.webp
Epic	Ember Drake	5%	companion-3.webp
Legendary	Dawn Phoenix	6%	companion-4.webp

Leveling

Companion level cap is 500. Wins grant 20 XP, dungeon boss wins grant 40 XP and defeats grant 5 XP. Each level adds 0.02 percentage points to the strength and protection bonus. Total XP to level L is $100 \times (L - 1) + 2 \times (L - 1) \times (L - 2)$.

Random abilities

Ability	Effect
Ferocity	Additional army attack multiplier.
Guardian	Additional dungeon casualty reduction.
Scavenger	Additional dungeon gold; never affects real PvP plunder.

Ability strength begins at 1% plus its 0.00 to 2.00 roll, then adds 0.004 percentage points per level. Companions do not permanently die. A defeat injures the bonded companion for 30 minutes; treatment costs 120 gold. Injured companions provide no bonus or XP.

AI strongholds

There are 18 AI raid targets: three ranks at every settlement tier. Players may attack targets within one tier for 8 AP. Each target has a 30-minute personal cooldown. Up to 12 victories per UTC day pay gold; defeats do not consume the daily win allowance. AI raids do not require PvP enlistment or verified email and award no renown.

Tier	Target	Defense	Bounty
Homestead	Bramble Camp	36	400
Homestead	Copperhill Hold	72	600
Homestead	Red Fox Outpost	120	880
Settlement	Morrowstead	120	800
Settlement	Blackwater Crossing	210	1,200
Settlement	Iron Crow Keep	320	1,760
Village	Saltwind Village	260	1,400
Village	Grimwatch	400	2,100
Village	The Wolf Court	600	3,080
Castle	Ravenstone Castle	500	2,200
Castle	Stormglass Bastion	750	3,300
Castle	The Gilded Marshal	1,100	4,840
Stronghold	Ashgate Stronghold	900	3,400
Stronghold	The Hollow Crown	1,400	5,100
Stronghold	Dreadspire	2,000	7,480
Citadel	Ivory Citadel	1,500	5,000
Citadel	The Obsidian Throne	2,300	7,500
Citadel	The Last Warlord	3,200	11,000

A win causes no casualties. A defeat consumes AP, starts the cooldown and loses up to 5% of attackers with Guarded, 10% with Balanced or 20% with Aggressive. At least one offensive soldier survives. Lost soldiers can destroy equipped army gear.

Real-player PvP, rankings and attack history

Entry and matchmaking

Real PvP requires a faction, Settlement tier, verified email and explicit enlistment by both players. Targets must be within one settlement tier. Same-faction attacks are allowed. An attack costs 8 AP, drops the attackers shield and cannot occur during a personal expedition.

Plunder

Rolled power / defense	Result	Share of exposed treasury
Below 1.0	Defeat	0%
1.0 to under 1.2	Narrow victory	15% to 40%
1.2 to under 1.5	Solid victory	40% to 70%
1.5 to under 2.0	Decisive victory	65% to 90%
2.0 or more	Dominant victory	90% to 98%

The exact share is independently randomized within the band. Bank savings, inventory and expedition satchels are protected. A successful cross-faction attack awards 20 renown; same-faction attacks award zero. Victims receive a one-hour recovery shield. Repeat attacks on one target require ten minutes.

Defender and attacker losses

Current PvP does not kill defenders or destroy defender gear. Failed attackers lose up to 5%, 10% or 20% by formation, with at least one survivor. Buildings are never destroyed.

Attack log status

The detailed incoming attack log is built and tested but not yet deployed. It records attacker, time, outcome, rolled attack versus defense, exact gold loss, troop and gear losses and recovery-shield expiry. It preserves 50 reports and unread status across devices. Older attacks continue to appear only in the general activity feed.

Overall leaderboard

The War Room shows the top 50 saved realms by overall power. Overall power equals army attack plus realm defense plus twice character attack and character defense. Stored items and wealth do not count. Ties share a rank.

Current screens and administrator tools

Screen	What is available
Overview	Settlement scene, resources, realm progress, next actions, latest activity and dungeon shortcut.
Settlement	Tier upgrade, benefits, payback preview, building construction and building navigation.
Army	Offense/defense totals, power, weapon and armor gaps, weapon mix, barracks, recruitment and transfers.
Armory	Role selector, equipment catalog, stored/equipped counts, buy/equip/store orders and replacement previews.
Your character	Inventory, equipped gear, comparisons, rune discovery state and companion details.
Dungeons	Three areas, stage progression, party size, formation, army/personal modes, boss presentation and battle logs.
War Room	AI strongholds, nearby players, PvP status, bank, faction contribution and overall leaderboard.
Trader	Three chests with odds and guarantee progress; sell unequipped loot.
Settings and guide	Sound, account/save status, instructional guide and activity history.

Administrator dashboard

The verified administrator can play normally and switch to a separate dashboard. It shows player count, PvP enlistment and suspension totals; searches players by exact email or ID; browses 25 realms per page; reviews treasury, bank, AP, renown, faction and tier; suspends or restores accounts with an audit reason; and runs read-only dungeon forecasts for selected players. It does not directly edit player gold or equipment.

Security and persistence

Firebase Authentication supports email/password and Google sign-in. Game actions are validated and executed by server functions in Firestore transactions with revision checks and replay receipts. Direct client progress writes are denied. Player names have a server-side profanity filter. Admin access is invitation and role based.

Current visual assets

The production game currently contains 15 WebP illustrations and one SVG favicon. Gear, runes, faction identity, buildings, regular dungeon enemies and AI rivals do not yet have dedicated artwork.

Production file	Current use
favicon.svg	Browser/app icon
art/chest.webp	Shared by all three chest tiers
art/companion-0.webp	Woodland Fox / common companion
art/companion-1.webp	Mossback Owl / uncommon companion
art/companion-2.webp	Silverfang Wolf / rare companion
art/companion-3.webp	Ember Drake / epic companion
art/companion-4.webp	Dawn Phoenix / legendary companion
art/dungeon.webp	Whispering Woods entrance and general dungeon scene
art/thornbound-boss.webp	Thornbound Guardian boss
art/crypt.webp	Hollowcrypt entrance
art/oathless-boss.webp	Oathless King boss
art/ember.webp	Ember Citadel entrance
art/flame-boss.webp	Last Flame boss
art/homestead.webp	Homestead scene
art/village.webp	Settlement and Village scenes
art/stronghold.webp	Castle, Stronghold and Citadel scenes; also war fortress

Current artwork gaps

Missing dedicated art	Count or scope
Army equipment	4 weapons and padded armor
Character equipment	Starter pair plus 10 generated loot items
Chests	Unique open/closed art for each of 3 tiers
Settlement progression	Dedicated Settlement, Castle and Citadel scenes
Buildings	Armory, barracks, bank, blacksmith, trader and watchtower
Factions	4 emblems, banners and commander portraits
Dungeons	12 stage scenes, 3 boss arenas and regular enemies
Runes	5
AI and player presentation	18 AI identities and reusable avatars

What is planned but not currently in the game

Planned concept	Current reality
Twenty dungeons across five regions	Only Whispering Woods, Hollowcrypt and Ember Citadel exist.
Expanded equipment slots	Only one weapon, one armor, two runes and one companion are implemented for the character.
Helms, chest pieces, gloves, greaves, boots, off-hand and accessory	Not implemented. Current armor is one broad slot.
Armor sets and 2/3/5-piece bonuses	Not implemented. Five set themes in the asset guide are proposals.
Large procedural loot pool with affixes	Not implemented. There are 10 generated gear names and power varies mainly by rarity and dungeon.
Crafting, salvage, rerolls, upgrades and materials	Not implemented. Items can currently be equipped, unequipped or sold.
Saved character loadouts and item locking	Not implemented.
Clans and mutual alliances	Not implemented. Factions are seasonal teams, not alliances.
Territory control and automatic seasonal rewards	Not implemented. Faction score exists; future reward delivery is undecided.
Cooperative raids and faction bosses	Not implemented.
Companion evolutions, skins or permanent death	Not implemented. Companions level, roll one ability and become temporarily injured.

Straight evaluation

Strongest current systems: server-authoritative progression, mixed army equipment, meaningful formation counters, partial troop deployment, risky personal expeditions, protected bank, AI income ladder and real PvP plunder bands.

Most limited current systems: dungeon quantity, character equipment slots, loot identity variety, visual coverage and long-term seasonal rewards.

Highest-value expansion order: define the expanded character item model and armor-set rules; add one complete fourth dungeon with its own enemies and loot; improve inventory filtering and comparisons; then scale content using the approved structure. This avoids creating hundreds of images for mechanics that may change.

Source and status note

Snapshot taken from `src/game/data.ts`, `engine.ts`, `progression.ts`, `rivals.ts`, `companions.ts`, `online.ts`, current React screens, Firebase functions and `public/art` on 17 September 2026. The attack log and prepared income curve passed local engine, backend and browser tests, but remain pending production deployment because Firebase CLI credentials expired.
